

# Lake Koshkonong Area Residents and Business Owners

A recent Wisconsin Supreme Court decision directs the Department of Natural Resources to gather comments and information from residents and businesses impacted by water levels on Lake Koshkonong.

The department is especially interested in any economic impacts, both positive and negative, to shoreline property owners or businesses resulting from either maintaining current water levels or increasing water levels as requested by the Rock-Koshkonong Lake District.

Comments and any supporting materials will be accepted through March 13.

Comments can be submitted by:
